NORTH SPITSBERGEN - ARCTIC SUMMER

The North Spitsbergen cruise sails to some of the remotest locations of northern Europe. The expedition gives you the opportunity to spot historic whaling remains, glaciers, a variety of Arctic birds including the Little Auk, and polar bears. Foxes, seabirds, and grazing reindeer From Trygghamna you walk to Alkhorner, a large seabird cliff where the birds are scouting out breeding places. Below the cliffs is a common place to spot Arctic foxes, and you may also see reindeer grazing on the lush vegetation if there's not too much snow. Remains of the whalers You sail into Fuglefjorden amid views of Svithjoddbreen and Birgerbukta, both breeding areas for great skuas as well as likely spots to see a polar bear. The aim is to visit Ytre Norskøya, a small island that served for many years as a Dutch whaling lookout. Here you can still follow the whalers' tracks to the summit of the island, passing popular bird cliffs on the way. On shore are the remains of more 17th-century blubber ovens, while Arctic skuas and common eiders breed among the graves of some two hundred Dutch whalers. Glaciers and Raudfjord geology Raudfjorden, on the north coast of Spitsbergen, is a fine place for gazing over the glaciers. It's also a favorite hangout for ringed and bearded seals, colonies of seabird, and the occasional polar bear and beluga whale. Alicehamna and Buchananhalvøya are fine places for gazing over the geology of the land. Wide open tundra If ice conditions permit, you may land on the northern side of Graahuken, an extensive tundra area of Spitsbergen, and walk from there to Hyttesletten. The plain is a popular grazing area for reindeer, and several species of waders also breed here. Similarly, the lakes afford you a good chance of spotting red-throated divers and king eiders. Monaco

Glacier Depending on the weather and sea ice, we could sail into Liefdefjorden, land at Texas Bar and cruise within sight of the 5-kilometer-long (3.1 miles) face of Monaco Glacier. The waters in front of this precipitous glacier are a favorite feeding spot for thousands of kittiwakes, and the base of the ice is a popular polar bear hunting ground. If ice conditions prevent us from sailing here early in the season, we may sail along the west coast of Spitsbergen. On to the little auks You then sail south to Magdalenafjorden, one of the glacier-filled highlights of Spitsbergen. A shore visit at Gravneset shows you the remains of 17th-century English whaling, and you can also see large colonies of little auks. Earth's northernmost community You head north for Kongsfjorden and Krossfjorden. We aim to visit places of historic interest: Ny London, where you can see the remains of early 20th-century marble mining, and Ny Ålesund, the northernmost community in the world. There are also research stations and the famous anchor mast of the dirigible Norge, which took the first flight across the North Pole to Nome, Alaska in 1926. Krossfjorden offers views of colossal glaciers and lofty mountain peaks. Walrus ashore On your journey south, the goal is a landing in Forlandsundet at Sarstangen, a walrus haul out. Alternatively you could land on the coast of Engelsbukta. The tundra here is a fine place for a walk to Hornbaekbukta. Also at Poolepynten is a walrus haul out. Wide tundra, towering mountains The next stop is Bohemanflya, an expansive tundra with its own avifauna (depending on when spring arrives) and spectacular geological formations along the coast. In Gipsvika you can go on shore near Templet, a mountainous location of eroded sedimentary rock from the

Upper Carboniferous period - around 290 million

Day 2: Foxes, seabirds, and grazing reindeer

From Trygghamna you walk to Alkhornet, a large seabird cliff where the birds are scouting out breeding places. Below the cliffs is a common place to spot Arctic foxes, and you may also see reindeer grazing on the lush vegetation if there's not too much snow.

Day 3: Remains of the whalers

You sail into Fuglefjorden amid views of Svitjodbreen and Birgerbukta, both breeding areas for great skuas as well as likely spots to see a polar bear. On Birgerbukta you can see 17th-century Basque ovens once used for cooking whale blubber. The aim next is to visit Ytre Norskøya, a small island that served for many years as a Dutch whaling lookout. Here you can still follow the whalers' tracks to the summit of the island, passing popular bird cliffs on the way. On shore are the remains of more 17th-century blubber ovens, while Arctic skuas and common eiders breed among the graves of some two hundred Dutch whalers.

Day 4: Glaciers and Ermaktangen geology

Raudfjorden, on the north coast of Spitsbergen, is a fine place for gazing over the glaciers. It's also a favorite hangout for ringed and bearded seals, colonies of seabird, and the occasional polar bear and beluga whale. Ermaktangen, at the fjordh coast of Spitsbergen, is a fine place for gazing over the glof the land.

years ago.

ITINERARY

Day 1: Largest town, biggest island

You touch down in Longyearbyen, the administrative center of Spitsbergen, the largest island of the Svalbard archipelago. Enjoy strolling around this former mining town, whose parish church and Svalbard Museum make for fascinating attractions. Though the countryside appears stark, more than a hundred species of plant have been recorded in it. In the early evening the ship sails out of Isfjorden, where you might spot the first minke whale of your voyage. In the evening you sail for Trygghamna, where you see the remains of a 17th-century English whaling station and 18th-century Pomor hunting station, both of which you can visit the next morning.

Day 5: Wide open tundra

If ice conditions permit, you may land on the northern side of Reindyrflya, the largest tundra area of Spitsbergen. This vast and rolling plain is a popular grazing area for reindeer, and several species of waders also breed here. Similarly, the lakes afford you a good chance of spotting red-throated divers and king eiders.

Day 6: The massive Monaco Glacier

Depending on the weather, you could sail into Liefdefjorden and cruise within sight of the 5-kilometer-long (3.1 miles) face of the precipitous Monaco Glacier. The waters in front of this glacier are a favorite feeding spot for thousands of kittiwakes, and the base of the ice is a popular polar bear hunting ground. If ice conditions prevent sailing here early in the season, an alternate route along the west coast of Spitsbergen can be implemented.

Day 7: On to the little auks

In the morning you land at Fuglesangen, where you can observe spirited communities of little auks. You then sail south to Magdalenafjorden, one of the glacier-filled highlights of Spitsbergen. A shore visit shows you the remains of 17th-century English whaling, and you can also see more large colonies of little auks.

Day 8: Earth's northernmost community

You head north for Kongsfjorden and Krossfjorden. The landscape is likely to show signs of winter, the crags and slopes still blanketed with snow. We aim to visit places of historic interest: Ny London, where you can see the remains of early 20th-century marble mining, and Ny Ålesund, the northernmost community in the world. There are also research stations and the famous anchor mast of the dirigible Norge, which took the first flight across the North Pole to Nome, Alaska in 1926. Krossfjorden offers views of colossal glaciers and lofty mountain peaks, but ultimately the extent of fjord ice dictates the itinerary here.

Day 9: The past days of polar bear hunting

On your journey south, the goal is a landing at Fuglehuken. Here you see remains from the great era of polar bear hunting. There are also large seabird colonies and a haul-out spot for harbour seals. Alternatively you could land on the coast of Forlandsundet, at Engelsbukta or Sarstangen. Walruses are occasionally seen here, and the tundra is a fine place for a walk.

Day 10: Wide tundra, towering mountains

The next stop is Bohemanflya, an expansive tundra with its own avifauna (depending on when spring arrives) and spectacular geological formations along the coast. In Gipsvika you can go on shore near Templet, a mountainous location of eroded sedimentary rock from the Upper Carboniferous period - around 290 million years ago.

Day 11: There and back again

Every adventure, no matter how grand, must eventually come to an end. You disembark in Longyearbyen, taking home memories that will accompany you wherever your next adventure lies.

Please Note:

All itineraries are for guidance only. Programs may vary depending on local ice and weather conditions and in order to take advantage of opportunities to see wildlife. The on-board expedition leader determines the final itinerary. Itineraries may mention places that require permission to land, which must be granted by the relevant national authorities. Such permission is not granted prior to the publishing of these itineraries. Flexibility is paramount for expedition cruises. Willingness to compromise on comfort is a basic requirement on board of a historic traditional sailing vessel. Important information about the sailing program: the boat is equipped with sails and these will be used in good conditions (open sea, water depth, appropriate wind conditions, time availability). This is not guaranteed. The captain decides whether to use the sails or the engine. There is no claim to one or other propulsion method. If sails are used, they are operated by the crew. Guests follow the safety instructions of the team. Average cruising speed for s/v Rembrandt van Rijn is 6.5 knots.

YOUR SHIP: REMBRANDT VAN RIJN

YOUR SHIP: Rembrandt van Rijn

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

S/V 'Rembrandt Van Rijn' was originally built as a herring lugger. The vessel was rebuilt as a three-masted passenger sailing schooner in The Netherlands in 1994 and sailed in Spitsbergen (1994 - 1996) and in Galapagos (1998 - 2001). The vessel underwent a complete rebuilding and refurbishment program in 2011. The communication and navigation equipment has been completely renewed according to the latest SOLAS regulations. The Rembrandt van Rijn measures 56 meters in length (168 ft.), 7 meters in width and has a draft of 2, 5 meters. The maximum engine speed is 9 knots. She has an experienced crew of 12 on board including two tour guides. The ship can accommodate a maximum of 33 passengers in 16 cabins: 1 Triple Private cabin with porthole (with shower and toilet), 6 Twin Private Inside cabins (with shower and toilet, no porthole), 9 Twin Private cabins (with shower and toilet and porthole). The general interior public areas include a spacious restaurant area so that all meals can be taken together as well as separate bar area and reading table area. There is room to relax, read and socialize. The ship is well suited for expedition cruising among small islands and offers excellent open deck viewing areas, even when under sail. The two inflatable rubber crafts (zodiacs) enable landing

and wildlife viewing opportunities in otherwise

inaccessible areas.
