

SOUTHERN GREENLAND EXPEDITION: ON THE TRAIL OF THE VIKINGS

Experience the enormity of Greenland - the world's largest island - where jagged peaks pierce azure skies, and countless glaciers snake their way towards the coast. Delight in hikes across tundra in search of arctic fox and reindeer, tasting delicious wild berries along the way. Zodiac-cruise along fjords where you might glimpse ringed seals lazing on sea ice calved from Greenland's enormous ice sheets--the largest in the Arctic, and perhaps encounter whales feeding in the nutrient-rich waters. Sail along Prince Christian Sound flanked by imposing mountains. Green pastures in south Greenland signal the presence of human settlement, and where Viking ruins of Erik the Red still stand at Hvalsey. Weaving through the fjords and channels, we enter west Greenland, the country's most developed region, home to the nation's capital, Nuuk and the world's northernmost capital. _On this voyage, we visit remote Inuit hamlets and settlements, where the local Inuit people still practice traditional hunting methods including whaling that some people may find confronting. If you find yourself feeling upset and disturbed by what you see, please alert a member of the expedition team immediately, who will do their best to address your concerns and take action to mitigate the problem, wherever possible._

ITINERARY

Day 1 Arrive in Reykjavik

Having made your way to Reykjavik, you will be met by a representative of Aurora Expeditions and transferred to our group hotel. Upon arrival at your included hotel, please visit the Aurora Expeditions hospitality desk to collect your luggage cabin tags and to speak with our ground operations team, who may have information to share with you about pre-embarkation or to provide you with information about where to dine, withdraw cash or purchase last minute items from a local pharmacy or supermarket.

The remainder of your time is at leisure. All meals today are at your own expense.

Accommodation: Fosshotel Reykjavik (or similar)

Day 2 Embarkation Day

Breakfast and check-out. Join our guided Golden Circle and Geothermal Energy tour. With 85% of it's electricity sourced from renewable sources, Iceland sets an outstanding example when it comes to sustainable energy.

Our journey takes us to the famous seismic sights of the Golden Circle route - Gullfoss waterfall, Geysir, and history-rich Thingvellir National Park, before we experience first-hand how

green, sustainable energy is produced at one of the largest single-site geothermal power plants on the planet at the Geothermal Energy Exhibition and Ljosafossvirkjun Power Station.

We'll also spend time at a true eco-village. Powered with thermal and solar energy, Solheimar is fully sustainable, boasting greenhouses and forestry programmes, while it's sustainable workshops are dedicated to candle-making, carpentry, weaving and soap-making. Late afternoon we return to Reykjavik for embarkation.

This evening, get to know your fellow expeditioners, expedition team and crew.

Day 3 At Sea

Crossing the Greenland Sea, we sail through the Polar Basin's nutrient-rich waters, searching for encroaching pack ice, fin whales and seabirds. Our team of experts entertains us with informative talks about sea ice, glaciers, European arctic plants and animals and epic tales of early explorers such as Nansen, Andree and Scoresby.

Day 4 Kangertivitatsiaq Fjord

Popular among skilled rock climbers, Kangertivitatsiaq Fjord is

home to spectacular mountain peaks and essential big walls that attract daring climbers. A new discovery for Aurora Expeditions in 2022, the 26-kilometre (16-mile) fjord is filled with glaciers including the Glacier of France. It's an ideal place for ship cruising, Zodiac excursions and discovery hikes.

Day 5 Skjoldungen Island

Continue south along Greenland's King Frederik VI Coast, always on the lookout for whales, especially the rare sperm whale that is occasionally seen here. Weaving through the narrow channels of Skjoldungen Fjord we land at the end of the fjord for a walk along a glacial river, across a tundra valley covered in northern willow and blooming pink wildflowers. Kayakers can paddle across the front of a tidewater glacier, search for harp seals, ivory gulls and whales.

Back on board, enjoy the stunning surrounds with a drink in hand basked in the soft light of the setting sun.

Day 6 Prince Christian Sound

Prince Christian Sound connects the Labrador Sea with the Irminger Sea. Approximately 100 km / 60 mi long, and, in parts, as narrow as 500-m (600-ft) wide, the fjord is flanked by jagged mountain peaks, some reaching over

2,200 m (7,200 ft) high, with countless glaciers coming all the way down to the sea. We slow-cruise through the sound to enjoy the spectacular scenery. Icebergs sculpted into fantastic shapes often block the entrance to the sound, a great spectacle for photography.

Day 7 Aappilattoq, Tasermiut Fjord, Klosterdal

Aappilattoq is a small settlement that lies in the southern section of a sound. Aappilattoq means red in Greenlandic, and the town is named after the red mountains rising above it. Aappilattoq is well-known in Greenland for the jagged mountain peaks that surround it--a delight for photographers.

The towering, jagged mountains that surround Tasermiut Fjord is why it's often referred to as the 'Patagonia of the north'. At Klosterdal, we are surrounded by three giant mountains - Napasorsuaq, Ketil and Nalumasortoq. Here we can walk to a Norse ruin, hike along the valley, or explore the bay by kayak.

Day 8 Nanortalik, Uunartoq

Continue to Nanortalik, the southernmost town in Greenland, located on an island of the same name. Its name derives from the West Greenlandic word 'Nanoq' meaning 'the place where bears pass through,' describing the polar bears that were once

seen floating past on sea ice. Deep fjords, woodlands and grasslands, and rugged mountainside cliffs, some over 1,000 m /3,280 ft, attract enthusiastic climbers from around the world.

On arrival, you'll receive a warm welcome from the local community who have opened up their town for you to explore. Nanortalik is a town that's known for their love of singing and you'll be treated to choir performance.

Visit Nanortalik Church, a wooden, Danish Lutheran church built in 1916 and is currently the only church serving the Nanortalik congregation. The church is in the old colonial quarter of the town. Next to the church is a landmark boulder called the 'Knud Rasmussen Stone,' named after Greenland's most famous citizen, Dr Knud Rasmussen, an explorer and ethnologist.

Day 9 Hvalsey, Qaqortoq

Hvalsey Church is the best-preserved Norse ruin in Greenland. 'Hvalsey' is old Norse for 'Whale Island.' Christianity arrived in Greenland around 1,000 AD and gradually churches began to be built. Late medieval documents indicate there were up to 14 parish churches in the Eastern Settlement. Hvalsey itself was built in the early 14th century, but it was not the first church built on this site.

After exploring Hvalsey ruins, continue to Qaqortoq, where our Zodiacs shuttle us ashore. Qaqortoq is the capital of South Greenland. With a history dating back to 1775, the town offers

various cultural activities and attractions including an outdoor art project called 'Man and Stone,' which features stone carvings scattered throughout the town created by local artists. Qaqortoq is Greenland's southernmost town and is the administrative centre of the south Greenland. Built from yellow stone, and dating back to 1804, the building that now houses the Qaqortoq Museum originally belonged to the town's blacksmith. Qaqortoq's landmark building is the Church of our Saviour. This large wooden Lutheran church, known as the 'Red Church', is in the historic part of town, near the harbour.

Day 10 Itilleq, Igaliku

Nestled on the shores of Davis Strait, the town of Itilleq is located on a small island only 2 km (1.2 mi) north close to the Arctic Circle. The island has no freshwater, so they have to make their own freshwater from a desalination facility.

The Davis Strait is Itilleq's major geographical feature. As a northern arm of the Labrador Sea, it stretches from the middle of Greenland to parts of Nunavut, Canada in the High Arctic. The numerous glaciers along the Davis Strait are an impressive sight, and while they may not be as impressive in size as the larger glaciers found in other parts of Greenland, the sheer volume of them here is impressive.

A self-guided hike through town reveals the beautiful, coloured houses, colours which in the past represented the profession of its owner. Continue your walk just outside of town to see the

picturesque mountain ranges surrounding the town.

At Igaliku in Tunulliarfik Fjord, lush valleys filled with tall grass hints at Greenland's first sheep farming settlement. Igaliku also guards the entrance to the well-preserved remains of Norse ruins allowing visitors to explore Norse history, hike within the UNESCO World Heritage-listed surroundings to discover lakes, mountains and hidden Norse ruins.

Day 11 Narsarsuaq, Qassiarssuk

Narsarsuaq is the gateway to hiking trails through lush valleys and Norse ruins spotted along Tunulliarfik Fjord.

Narsarsuaq holds historical significance to Greenland's history. The Norse Vikings settled in this area in the 12th century and gave Narsarsuaq a name to suggest that an Arctic forest covered the large plain. Taking home stories of lush valleys and plains nestled in deep fjord, the Vikings called this country Greenland. Marked trails allow hikers to enjoy the superb scenery, with the one of the most popular hikes leading to the spectacular lookout over icebergs in the Tunulliarfik Fjord and the Qooroq Glacier.

At Qassiarssuk, located directly across the Tunulliarfik Fjord, follow in the footsteps of Erik the Red and discover why he made it his home. The remains of a church, stables, hall and other buildings can still be seen. Visit the tall statue of Leif Erikson (son of Erik the Red) overlooking the town and fjord.

Sailing between Hvalsey, Igaliku and Qassiarssuk allows you to connect the dots of Viking history in Greenland.

Day 12 At sea

As we sail towards Nuuk, enjoy some free time relaxing or attending a presentation from our expedition team. This evening, share stories and celebrate with fellow expeditioners at Captain's Farewell Dinner.

Day 13 Disembark in Nuuk, fly to Toronto

Disembark in Nuuk, Greenland's capital, where you farewell the crew and expedition team before transferring to the airport for our charter flight to Toronto.

Accommodation: Westin Toronto Airport Hotel (or similar)

Day 14 Depart Toronto

After breakfast, check out of your room and continue your journey with a transfer to the airport.

Please Note:

In true expedition style we encourage exploration and adventure, offering flexibility in challenging environments in a way that puts you among the action to see and do as much as possible. This itinerary is only a guide and subject to change due to ice and weather conditions.

YOUR SHIP: SYLVIA EARLE

YOUR SHIP: Sylvia Earle

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Sylvia Earle made her inaugural cruise in 2022; she honours the highly accomplished marine biologist, oceanographer and explorer, Sylvia Earle. As the first female chief scientist of the U.S. National Oceanic and Atmospheric Administration, and named by Time Magazine as its first Hero for the Planet in 1998 - this vessel pays tribute to Sylvia's long standing conservation efforts for marine protected areas and ocean wildlife. Sylvia Earle will be actively involved in the development of her namesake. The streamlined Ulstein X-BOW® cuts through the swell so you feel fewer vibrations and disturbances, and makes quicker transits through waves. It also helps reduce fuel consumption by up to 60%^.

Experience the Glass Atrium Lounge inside the bow, featuring huge windows and superb views to the front of the ship. In between landings, enjoy the heated saltwater open air swimming pool and jacuzzis on board the Sylvia Earle and watch the world go by, or experience our gym, sauna or enjoy a massage (additional cost) in the Wellness centre. Sylvia Earle carries many Zodiacs, which you can board via four dedicated, sea-level launching platforms. These platforms make boarding the Zodiacs as quick, efficient and safe as possible, minimising wait times and getting you

closer to the action for longer. Dining One of the most important parts of any expedition is the food! Whatever adventures the day holds, you will be fuelled-up with hearty meals and delicious morning/afternoon teas cooked by our onboard chefs. Meals are a great time to soak up the expedition camaraderie in our open seating dining area. Share stories with your fellow travellers and ask our expedition team questions that may have come up during the day. Tea, coffee and snacks are available 24 hours a day, and our chefs offer different menu options and courses for each meal. Enjoy the range of house wine, beers and soft drinks included with dinner after a long day in the wild. We also invite you to join your captain and expedition team for informal Captain's Welcome and Farewell drinks, with complimentary beverages and cocktail appetisers, followed by a 3 course meal. Responsible Travel We believe that preserving and protecting the environment is of the utmost importance and this is reflected in several features of the Sylvia Earle. The Sylvia Earle will boast one of the lowest polluting marine engines in the world due to low energy consumption, high fuel-efficiency and a streamlined design to deliver an 80% reduction in emissions. The ship can also utilise virtual anchoring to hold its position using a combination of GPS, steering technology, propellers and thrusters. This protects the sea floor and minimises the damage caused by conventional anchors. Compared to Tier
