

WILD ARCTIC SHORES: CIRCUMNAVIGATING ICELAND AND EXPLORING GREENLAND

Experience geological extremes across two distinct Arctic islands, from the thundering waterfalls and bubbling hot springs of Iceland to the rugged fjords that carve out the coast of East Greenland. Hike and bike over volcanic landscapes, witness iconic wildlife in remote fjords, learn history steeped in sagas and see local traditions in tiny seaside villages as you circumnavigate Iceland. Across the Denmark Strait, navigate and actively explore a network of a network of wild fjords, and take in Greenland's spectacular tidewater glaciers. Along the way, Icelandic experts and musicians add insight and energy to this immersive Arctic adventure.

ITINERARY

Day 1 Reykjavík, Iceland / Embark Ship

Arrive in Reykjavík, the world's northernmost capital, which lies just below the Arctic Circle. Transfer from the airport to the city and spend the day exploring at your own pace. Check in with the hospitality desk this afternoon before embarking the ship.

Meals Included: Dinner

Day 2 Westfjords

Explore the dramatic and remote Westfjords region of Iceland. Hike along the base of a fjord to discover a towering waterfall

before entering Ísafjarðardjup, known for its wealth of wildlife, including whales, seals and countless nesting seabirds. Land at Vigur Island, a fragile wildlife sanctuary, where the landowners continue the traditional eiderdown collection and cleaning process and are active stewards of the colonies of puffins, eider ducks and black guillemots who call the island home.

Meals Included: Breakfast, Lunch, Dinner

Day 3 Siglufjörður

Siglufjörður was the center of Iceland's once-thriving herring industry. Stop by the Herring Museum for a salting demonstration and a tasting. Enjoy the surroundings of Iceland's northern most mainland settlement by joining the local forestry association for an afternoon of conservation in their local woods.

Meals Included: Breakfast, Lunch, Dinner

Days 4-5 East Coast of Greenland

Strike out across the Denmark Strait to the wild shores of Eastern Greenland. Known for its volume of calving tidewater glaciers stretching back to the ice sheet, this region offers incredible opportunities to explore multiple fjords aboard ship as well as on landings, where hiking, kayaking or Zodiac cruising might all be possible. While you navigate these waters as a modern-day explorer, spend time on the Bridge or at the ship's railing, scouring the landscape and waterline for the unique wildlife that call this region home. Look out for humpbacks, beluga whales and seals as well as the elusive narwhal and polar bear.

Meals Included: Breakfast, Lunch, Dinner

Day 6 Húsavík

Húsavík is the gateway to the Highlands of northern Iceland. Depart for a full day overland visiting one of the largest waterfalls in Iceland, Goðafoss, as well as Lake Mývatn, the most geologically active area in Iceland. Alternatively, enjoy an adventurous journey through Ásbyrgi Canyon, said to be formed from the hoof of Odin, with a stop at Dettifoss, the second most powerful waterfall in Europe, or stay along the coast and enjoy a slower pace to the day with forest bathing, bird watching and a soak in the GeoSea bath.

Meals Included: Breakfast, Lunch, Dinner

Day 7 Grímsey

This morning, take Zodiacs ashore to the tiny island of Grímsey, which lies exactly on the Arctic Circle. Celebrate officially arriving in the Arctic, in the company of nesting arctic terns, fulmars and puffins in their burrows. Enjoy an afternoon at sea sailing around the northern corner of Iceland as you continue circumnavigating the island.

Meals Included: Breakfast, Lunch, Dinner

Day 8 Borgarfjörður Eystri

Located on the eastern shore of Iceland, Borgarfjörður Eystri is well known for its local puffin colony and stunning fjord framed

by the Svartvell Summit. Challenge yourself with a hike up to the summit, standing over 1000 feet above sea level, or bike into the backcountry to take in a different perspective on the surrounding mountain range. Join a local guide on a walk through the small village, including a stop at the local eider down shop or get a taste of the local libations. Throughout the day, enjoy some free time observing the puffins in their bustling island colony as they make their way in and out of their burrows.

Meals Included: Breakfast, Lunch, Dinner

Day 9 Westman Islands

The Westman Islands were formed by undersea volcanoes between 5,000 and 10,000 years ago and are among the youngest of the world's archipelagos. In 1963, the world witnessed on film the birth of its newest island, Surtsey--a UNESCO World Heritage site--which you'll see as you cruise past the coast. In 1973, Heimaey was threatened by lava flows that nearly closed off its harbor. Visit the crater, where the earth is still hot, for amazing views of areas once engulfed by lava.

Meals Included: Breakfast, Lunch, Dinner

Day 10 Reykjavík / Disembark Ship

Disembark in Reykjavik and transfer to the airport for flights home.

Meals Included: Breakfast

YOUR SHIP: NATIONAL GEOGRAPHIC ENDURANCE

YOUR SHIP:	National Geographic Endurance
VESSEL TYPE:	Expedition Ship
LENGTH:	
PASSENGER CAPACITY:	126
BUILT/REFURBISHED:	2018

A next-generation expedition ship, purpose-built for polar navigation. National Geographic Endurance is a next-generation expedition ship, purpose-built for polar navigation. A fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessel, it is designed to navigate polar passages year-round, and safely explore uncharted waters, while providing exceptional comfort. Its patented X-BOW® is key to its design; its powerful wave-slicing action provides an extremely smooth ride in even adverse conditions, and even reduces spray on deck, for superior observation. She carries a full suite of expedition tools and offers a variety of experience-enhancing amenities. The luxury of comfort on expedition National Geographic Endurance comfortably accommodates 126 guests in 69 outside-facing cabins. Cabins are efficiently designed, with sizes range from the 140-square-foot solo cabin to the 430-square-foot category 7 suite. Fifty-three of the 69 cabins, including all 12 of the solo cabins, will feature small balconies with floor-to-ceiling sliding doors that bring in the spectacular views and ample natural light. Comfort & convenience in every room Every cabin has two portholes, a large window or balcony, and temperature controls. Bathrooms are modern and stocked

with botanically inspired hair products, soap, and shower gel, plus a hairdryer. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Dining: Food served aboard is fresh, local, and delicious, and sourced from suppliers who share our values of sustainable use whenever possible. Meals aboard are almost always served in the dining room, located aft of the lounge deck. When weather conditions allow, lighter fare may be served on the observation deck. There is no assigned seating and our dining room accommodates the entire expedition community in a single seating. During meals your expedition leader, naturalists, and any guest speakers aboard will join you. Public Areas: Two restaurants, a Chef's Table for small group dining, Observation Lounge with bar, gym, Wellness area, infinity-style outdoor hot tubs, library, main lounge with full service bar, 24-hour beverage, state-of-the-art facilities for films, slideshows and presentations, and a photo workshop area; plus, an expedition base with lockers for expedition gear, and an "open bridge" for access to our captain, officers and the art of navigation. Meals: Two restaurants, featuring local, sustainable choices and unassigned seating for flexible, inclusive dining; plus a Chef's table for intimate, small group dining. Main restaurant has 270° views, and the Observation deck restaurant features lighter, made-to-order fare. Cabins: All cabins face outside with large windows, private facilities and climate controls. 53 cabins have balconies. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Expedition Tools: Zodiac landing craft, kayaks,

snowshoes, cross-country skis, undersea specialist operating a remotely Operated Vehicle (ROV) and underwater video camera for unique access to polar marine world, hydrophone, aerial remote-controlled camera and video microscope. Special Features: A full-time doctor, undersea specialist, National Geographic photographer, Lindblad-National Geographic certified photo instructor and video chronicler, an internet cafe and laundry. Wellness: The vessel is staffed by our wellness specialists and features a glass-enclosed yoga studio, gym, treatment rooms and spa relax area, and high- and low-heat saunas with ocean views. Expedition Landing Craft: Key to our operation is our fleet of expedition landing craft, which we use to land in places that would otherwise be inaccessible. With 8 of these boats and two loading stations used every time we disembark, we're able to transfer guests off the ship quickly, so you can be out on adventures, not idly waiting. The expedition landing craft we use are 19 feet long, powered by four-stroke outboard engines, and are capable of comfortably carrying 10-12 people. They are widely recognized as the safest and most versatile small boats afloat. Remotely Operated Vehicle: Capable of reaching 1,000 feet, far beyond the range of any Scuba diver, the ROV allows you to literally view parts of the undersea that are as unexplored as the moon. Chances are you, like many of our guests, will be struck by how surprisingly colorful undersea life is in these unlikely places. And this glimpse may fundamentally change how you view the ocean. Kayaks: National Geographic Endurance will be equipped with a fleet of kayaks large enough to ensure everyone who wants to can paddle at every opportunity. Consequently, prior kayaking experience isn't necessary--many of our guests have their first kayaking experience in extraordinary locations. Our custom-designed floating platform lets us deploy kayaks from

the ship, or any location we want--including far from shore. Kayakers are usually free to explore where they want within boundaries set by the undersea specialist and officer of the watch. Underwater camera: Our undersea specialist will dive often during your expedition, even in Alaska, with cold-water gear, to shoot high-definition, Cousteau-like footage of the deep. Colorful nudibranchs, swimming, plant-like crinoids, and mysterious fish with antifreeze blood that thrive in the frigid sea will give you an entirely new appreciation of the marine environment. Video microscope: Naturalists will use the video microscope to help explain all elements of the environment, including tiny organisms that are the building block of the marine ecosystem. Spellbinding live views of krill at 80x magnification fills the high-definition screens in the lounge with vivid detail, and fills every onlooker with a sense of wonder at the importance of otherwise unobservable creatures. Hydrophone: This underwater microphone is deployed to listen to the vocalizations of marine mammals. Real time transmissions of their eerie, haunting sounds can be broadcast through the ship or recorded for later playback. Few experiences in nature are as captivating as watching humpback whales feed close to the ship as their vocalizations play through the ship's PA system. Electronic charts: An electronic chart showing the ship's location, course, and speed is almost always on display in the lounge. Open bridge: You'll find our captains are engaged, knowledgeable members of your expedition who are eager to share their passion with you. Venture's open bridge features comfortable spaces to sit, enjoy the view, drink your morning coffee, or simply chat with the officers. Snorkeling gear & wetsuits: On warm weather itineraries where there will be snorkeling, you'll select a mask, snorkel, fins, and wetsuit that remain yours for the duration of the expedition. There's no need
